

Measuring Posts for Bollard Sleeves & Signs

1. Measure the **diameter** and **circumference** (distance around post). Round up to the nearest 1/4". Ex: 12-5/8" rounds up to 12-3/4".
NOTE: Be sure there is nothing over the bollard when measuring.

2. Measure the **height** from ground to edge of steel post (not to the top of the cement cap)

	_____	_____	_____
	Height (inches)	Color (Custom Colors Additional Cost)	Quantity
	<input type="checkbox"/> Thin wall (1/8")	<input type="checkbox"/> Thick wall (1/4")
